ETA webinar

"LNG and Hybrid tugs, experiences so far and future outlook"

17th February 11.00am - 12.10am CET

The environmental regulations and the targets set out on the maritime industry have put on the forefront the requirement to start looking at cleaner vessels and more environmental friendly fuels. Whereas different technologies are being proposed and developed it is clear that there will not be a one-size-fits-all solution for the industry. A number of members have already been investing in cleaner technologies and have been early adaptors of some of these innovative solutions.

The aim of this webinar is to listen to the experiences of members and companies who have invested in LNG and hybrid technology and to know more about the upcoming technical and policy developments that will support the adoption of these solutions.

Programme

Opening by the ETA Chairman Capt. Kimmo Lehto (2min)

Introduction by the moderator Steve Dougal, Century Marine Services (2min)

Part one: Company experiences operating hybrid and LNG-fuelled tugs.

Vetle J. Sverdrup - Buksér og Berging AS (10mins)

Koos Smoor - Kotug International (10mins)

Geert Vandecappelle - Boluda Europe (10mins)

Part two: What will the future bring to LNG and hybrid technologies

Celine Audenaerdt - Port of Antwerp (10mins)

Roxana Caliminte - Gas Infrastructure Europe (10min)

Discussion and conclusion (10min)

Participants will be able to make comments and questions on both Slido and Zoom and these will be referred to the speakers during the webinar.
